

MODULE 5 SUMMARY

Monitor

In order to maintain the expectations, it's necessary to **monitor** student performance.

Monitoring involves **observation** and **feedback**.

■ Observation

As you observe, provide **prompts** and **reminders**.

■ Feedback

- **Correction**

Mild correction tells the student what needs to be changed in order to meet the expectation.

- **Reinforcement**

Reinforcement encourages the student to maintain the positive behavior. **High rates of reinforcement** for appropriate behavior are extremely powerful incentives.
